

At the time of this writing, 420 species of birds have been recorded in the State of Ohio. The 362 species on this checklist include both regularly occurring species and Review Species which have occurred and been accepted by the Ohio Bird Records Committee (OBRC) since 1997.

Species marked with an asterisk (*) are OBRC Review Species. Observations of these species, as well as any species not on this checklist, are important and should be well documented with written notes, sketches, photographs, and/or vocal recordings if possible. The OBRC welcomes the receipt of such documentation.

Taxonomic order and nomenclature are from the 7th Edition (1998) of the AOU *Check-list of North American Birds* and its subsequent Supplements through July 2007.
