

Annotated Bibliography of Ohio Ornithology

Below are references, some briefly annotated (underlined text) where helpful, to published works on the ornithology of Ohio. Out of print volumes mentioned are on the shelves of good libraries. Key words may be searched in the site's search engine. Every effort will be made to include all important sources, but this bibliography is, and will remain, a work in progress, and much compiling and annotation lies ahead. The compiler would be grateful to hear from readers who have additional entries to suggest. After my labors thus far I am moved to offer my profound gratitude to bibliographers of the past. Bill Whan, for the Ohio Ornithological Society.

Contains excellent "record of sightings" graphs detailing numbers of individuals and weekly and monthly sightings patterns for a number of the species treated in the text.
